Professional Profile

Computer Engineering graduate with hands-on experience in AI, software development, and collaborative technical projects. Through internships, fellowships, and organizing technology events, I have developed strong communication, coordination, and problem-solving skills while working with cross-functional teams. I enjoy bringing structure to projects, supporting team collaboration, and contributing to the successful delivery of technology solutions.

Education

Bachelor in Computer Engineering

2022 - 2026

Khwopa College Of Engineering

Technical Skills

Programming Languages: Python, JavaScript, C, C++, Dart

Frontend: React.js, HTML5, CSS3, Flutter

Backend: FastAPI, Flask, Node.js

Databases: MySQL, Firebase

Artificial Intelligence: Scikit-learn, PyTorch, OpenCV, YOLO, NLP, Stable Diffusion, LoRA Fine-tuning

Tools: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Figma

Soft Skills

Problem Solving, Analytical Thinking, Team Leadership, Communication, Collaboration, Adaptability, Time Management

Experience

AI Fellow

April 2026 – Present

Fusemachines

- Participating in an intensive AI fellowship covering Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, and Generative AI.
- Built multiple AI and deep learning projects using Python, PyTorch, OpenCV, and Scikit-learn.
- Implemented neural networks, computer vision pipelines, and machine learning models through hands-on assignments.
- Gained practical experience in data preprocessing, model training, evaluation, and deployment of AI solutions.
- Currently developing an AI-powered Medication Management Agent as the fellowship capstone project.

AI Engineer / Python Developer Intern

Oct 2025 – Nov 2025

IT Together Pvt. Ltd.

- Developed AI-based applications using Python and machine learning techniques.
- Worked on Retrieval-Augmented Generation (RAG) systems for intelligent document retrieval.
- Performed data preprocessing, analysis, and visualization on real-world datasets, including Nepal Election data.
- Collaborated with mentors to design and implement AI-driven AI solutions.

Documentation Lead — Tech Carnival 2025

- Led documentation and reporting for Tech Carnival 2025.
- Coordinated with organizing teams to manage technical documentation and event activities.
- Served as College Representative (CR) for Code for Change Kathmandu, representing Khwopa College of Engineering.

Projects

- **Virtual AI Try-On System**

- Developed a deep learning-based virtual try-on system using Stable Diffusion and LoRA fine-tuning.
- Built an image generation pipeline capable of generating realistic images clothes from prompt and of users wearing selected garments using prompts and clothing images.
- Worked with Hugging Face Diffusers, PyTorch, OpenCV, and large-scale fashion datasets.

- **Phishing Website Detection System**

- Developed a machine learning model to detect phishing websites .
- Performed feature extraction, data preprocessing, model training, and evaluation.
- Utilized SQL for structured data management and achieved high classification performance.

- **Revolv : Business Workflow Management Platform**

- Developed a web platform for digitizing organizational workflows.
- Built responsive user interfaces using React and modern web technologies.
- Developed backend services and integrated APIs for workflow automation.
- Designed database structures to manage organizational data efficiently.

- **Histoury**

- Developed an augmented reality mobile application for promoting historical tourism using Flutter.
- Integrated AR experiences, interactive quizzes, educational mini-games, and audio guides.
- Designed engaging learning experiences through interactive historical content.

- **Aahar : Food Ingredient Analyzer**

- Built a Flutter-based mobile application for analyzing food ingredients.
- Integrated chatbot functionality and Firebase backend.
- Implemented allergen detection and vegan/vegetarian ingredient identification.

Awards and Certifications

- Winner - Hack4SafeFood National Hackathon (Vertex Special Technology Nepal)
- Winner- Hack the Circle Hackathon (Project: Histoury)
- Winner (Education Track) - DeerHack Hackathon
- People's Choice Award - CodeYatra (Project: Revolv)
- Python for Data Science Certification
- Deep Learning with Python Certification
